## P4000 Splice Connectors

For suspended structures. Contact Cabstrut - Old Mill RD - 12, Ndabeni Western Cape - 021 530 3560

Sometimes other substrates are combined with X-Board. In this case high strength adhesives are used.

Metal edging can be used for high friction or hard working edges and surfaces.

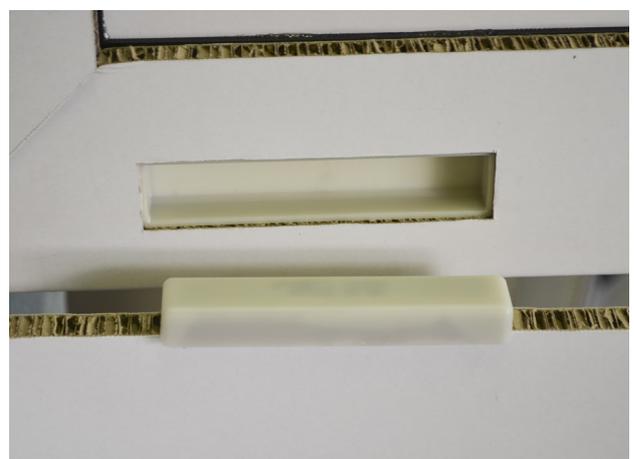

Tie rods with a washer and nut are used to hold some FSU's together for extra rigidity.

Varnishes are used for high moisture environments. Both matt or gloss are available.

All kinds of edging are possible. One can expose the X-Board core for decorative effect too.

A demonstration as to how to use the Promo Table Tabs when secured into the Table top & Base.
